

# Reduce data security and privacy efforts from months to hours

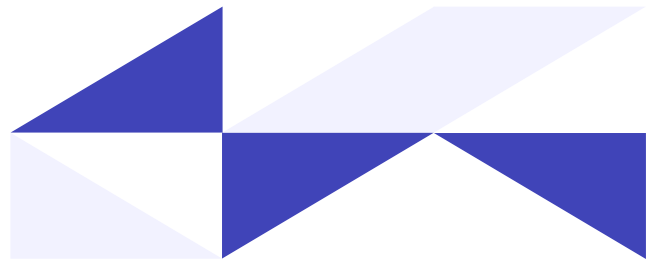

Discover personal data and compliance gaps. Achieve continuous compliance (GDPR, CCPA)

Find top 1% vulnerable data, over-exposed data, and high-risk activities

Review users' data access permissions. Find high-risk users with excessive privileges

	Without Protecto	With Protecto
PII scanning, data discovery	3-4 weeks	2-3 hrs
Audit user permissions	3-4 weeks	<1 hr
Review activities	3-5 weeks	1-2 hrs
Create compliance reports	3 weeks	1-2 hrs
Find over exposed data	3-4 weeks	< 1hr
Reduce stale data	3-4 weeks	<1 hr
	6 Months per year	6 Hours per year

Estimates for analyzing 1TB data stored across 5K data assets

## DATA POSTURE INTELLIGENCE

*Problem: Enterprise data is complex. Privacy, security, and governance teams must depend on data engineers spending months.*

Protecto's Data Posture Intelligence applies privacy engineering and artificial intelligence to discover privacy, security, and governance issues in minutes.

## AGENTLESS, NO-CODE SETUP

Protecto delivers results in minutes. It is non-intrusive and doesn't complex installation.
